GALEON

Robotic Pool Cleaners

Environmentally friendly, all units function on safe and economical 24 volt motors. Galeon units completely clean any size and shape residential swimming pool. Ultra-modern high speed motors and state-of-the-art technology combine quality and efficiency like no other pool cleaner and pool vacuum produced. Fully independent, Galeon pool cleaners work without any connection hoses, hook-up booster pumps, or suction lines.

They require **NO INSTALLATION, NO SUPERVISION** with **MINIMAL MAINTENANCE**. Plug the unit in, drop it into the pool and turn it on. When the cleaning cycle is over, Galeon will turn itself off... automatically.

Robotic Cleaners for Residential Swimming Pools

GALEON

Specifications at a glance:

GALEON FL

Cycle time	2.5 Hr.
Recommended Pool Size	60 m²
Cable length	17m.
Filter Bag porosity	2 micron
Suction rate	16m³ / Hr.
Motor unit voltage	24 VDC
Power supply	IP 54

GALEON MD

Cycle time	3 Hr.
Recommended Pool Size	80 m²
Cable length	18m.
Filter Bag porosity	2 micron
Suction rate	16m³ / Hr.
Motor unit voltage	24 VDC
Power supply	IP 54

GALEON RC

Cycle time	1.5 Hr.
Recommended Pool Size	100 m²
Cable length	18m.
Filter Bag porosity	2 micron
Suction rate	16m³ / Hr.
Motor unit voltage	24 VDC
Power supply	IP 54
